PRESS RELEASE

12-3-25

At STAND North Dakota, everything we do is driven by one goal: making our community safer. Our recent move has sparked questions and concerns. The community has spoken, and we are listening.

We are committed to being good neighbors. We are listening to feedback and are continuing to dialogue with concerned citizens. We are thankful also for the many calls and emails in support of the work we do and our shared vision of eliminating sexual abuse. That's the important work our organization has been doing in our community for over a decade.

We appreciate that the Coalition has brought us not only their concerns, but also suggestions for alternatives and a willingness to work together towards finding common ground. While we may disagree on the feasibility of some of the alternatives and suggestions presented, we are committed to exploring each one.

We look forward to continuing to work together. Together, we can prioritize prevention, safety, and a stronger North Dakota.
